Industrial Robotics

SCARA COBOT

Our latest one of a kind Light Collaborative Robot is perfect for industrial use. It's SCARA class also enables our Cobot to be used in Medical and 3C industries because of its high accuracy and speed. While pick-n-place is one application, you can also change its tool end to use it for 3D printing, soldering, laser engraving, object recognition, sorting and so on. Possibilities are endless. Our Cobots are designed for SMEs. Hence, they are affordable, precise & smart.
